

Training Services

Enable your company to make the most of your investment

The training program at Net Insight's Sync Academy offers a comprehensive set of courses, which allow for in depth product and solution knowledge for both network operation, network support and network planning. Our training is offered in a variety of different formats including customer as well as partner training offered via classroom or webcast. All participating students receive the relevant literature in electronic format. The courses at the Net Insight Sync Academy covers both Nimbra TimeNodes and Nimbra TimeNode management as well as the Zyntai product family including the Zyntai Director.

Sync Academy

Our Sync Academy handles all the training programs for synchronization solution, including Precision TimeNet.

Subject Specific Training

Subject specific training is a new addition to the Net Insight training portfolio, which allows a competent staff access to Net Insight experts on topics for which they need extra assistance.

Benefits

- Enable your organization to make the most of your investment
- Your personnel can drive the training with pre-emptive requests of the knowledge they require
- Covers all knowledge of the entire solution portfolio, both for Nimbra TimeNode and Nimbra TimeNode Management as well as the Zyntai products and Director
- Fill the gaps in knowledge of competent personnel
